Remove fat, reduce inches.

- ▶ ZERO Pain
- ▶ ZERO Surgery
- ▶ ZERO Downtime

Remove stubborn body fat from:

- Neck
- Arms
- Back/bra-line
- Tummy/waistline
- Love handles
- Hips
- Thighs
- Knees

Is ZERONA® right for you?

Are you looking for an effective way to slim down and lose inches?

Are you looking for a proven, safe and painless alternative to the surgery, pain, and recovery time associated with traditional invasive surgery techniques?

Are you looking for a less expensive alternative to liposuction?

If so, then ZERONA is right for you.

Ask your doctor or nurse today about ZERONA!

ZERONA has been featured on:

And seen in:

“When something sounds too good to be true, it usually is. But you cannot argue with results. Inches are inches, and ZERONA removes inches, more than four inches on the “test” case we did for The Doctors. I have to say, I didn’t believe it at first either. ”

— Dr. Drew Ordon, Lead Physician on the Hit T.V. Show “The Doctors”

See for yourself.

Patient results are in...

- ▶ 80% of patients lost over 6 inches.
- ▶ On average, patients lost 5.9 inches combined from their waist, hips, and thighs.
- ▶ On average, patients lost an additional 6.8 inches combined from their knees, neck, upper arms, and bra-line.

What you can expect.

ZERONA is six, quick and painless treatments administered over a two week period.

You simply lie under the ZERONA slimming device for 40 minutes, 20 minutes on your front and 20 minutes on your back.

ZERONA uses a clinically-proven, safe low-level laser that does not produce heat.

After completion of the two week clinical trials, on average patients lost 3.64 inches with some patients losing as much as 9 inches.

Average slimming effects of ZERONA

	Average Loss (inches)	Max. Patient Loss (inches)
Waist	2.1	3.3
Hips	1.8	3.1
Thighs	2.0	5.3
Knees	1.7	4.4
Neck	1.2	2.6
Upper Arms	1.9	6.0
Bra-line	2.0	3.5
Total	12.7	28.2

Percentage of Patients	Inches Lost
46.2%	6.00 to 9.99
23.1%	10.00 to 14.99
19.2%	3.00 to 5.99
11.5%	15.00 to 28.50

How ZERONA works...

ZERONA is a painless, low-level laser treatment designed to remove fat and slim the body without invasive surgery.

Clinical trials confirmed the amazing effects that ZERONA had on fat storing cells. The results demonstrated that a small pore was created in the membrane of the fat cell enabling the fat to seep out of the cell. The excess fat was then passed out of the body during its normal course of detoxification.

(Actual photos of fat emulsification.)

What you need to know.

What areas of the body can I use ZERONA on?

The ZERONA treatment can be used effectively on essentially every part of the body where localized fat deposits exist that are resistant to diet and exercise. Most patients start with treating the waist, hips and thighs which can all be targeted in 1 treatment. Other areas include upper arms, bra-line fat, inner knees, back fat and buttocks.

Is it safe?

Yes, there is no risk involved in using the ZERONA low-level laser therapy and it is considered a safe alternative to invasive procedures such as tumescent liposuction and lipodissolve and other non-invasive devices like the Accent, VelaShape, and Thermage, which rely on heating the tissue and can cause discomfort. None of these have the proven data showing how fat cell size is reduced like the ZERONA. The ZERONA treatment is 100% non-invasive and causes no bruising, scarring and zero downtime. During the treatment you will feel no discomfort, no anesthesia will be used and you can assume normal activities immediately following each treatment.

Are there any side affects?

No. The treatment process is completely non-invasive and there are absolutely no side effects beyond loss of inches and fat.

Does It Really Work?

Yes, by following the recommended guidelines for success, you can expect to experience a loss of 3 – 9 inches from your waist, hips and thighs and a reduction in clothes size.
